Marcello Annicchiarico

Senior Frontend Developer

With over ten years of experience as a Senior Frontend Engineer, I've developed a strong foundation in software development, user interface and graphic design, and data visualization. I'm passionate about crafting high-quality UI libraries and progressive web applications, particularly for SaaS and B2B products. I'm eager to share my portfolio, which showcases my projects and provides a deeper look at my skills and accomplishments.

EXPERIENCES

Eva Global — Berlin, Germany

Senior Frontend Developer — Employee Full-time

Oct 2022 - May 2024

Eva Global helps customers manage their electric vehicle charger infrastructure and provides a superior customer experience to EV drivers. As a senior frontend engineer, I was responsible for building the UI library using Angular Material and building multiple features for the Monitoring project . I also worked as a UX designer providing multiple designs for the new features like the Heatmap.

Technologies: Angular, Material, NX, GraphQL, Storybook, Gitlab, Jira, Figma

LINUS Finance — Berlin, Germany

Senior Frontend Developer — Employee Full-time

Sep 2021 - Aug 2022

LINUS Finance is one of the leaders in Real Estate in Germany. I started work with the core of the team rebuilding the new UI, working on the new registration, creating the template of the Product, and building different landing pages for the Marketing team.

Technologies: React, Vue, GraphQL, Docker, Builder, Github, Jira, Styled, Figma

Building Minds — Berlin, Germany

Frontend Developer — Employee Full-time

Jan 2020 - Aug 2021

BuildingMinds believes in empowering the real estate industry with advanced digital solutions, building an application with Angular and Microsoft services. I worked on the implementation of many features moving around different teams, focusing on different Components, and creating the app Management.

Technologies: Angular, Redux, Bootstrap, Azure, Abstract, Material, Firebase, Jest

YUKKA Lab — Berlin, Germany

Frontend Developer — Employee Full-time

Jun 2017 - Nov 2019

Yukkalab is an application for desktop and mobile that uses different frameworks such as

Angular, Firebase, Highchart, and D3 to build interesting visualizations like the [Network](#), [Chartmap](#), or [Signals](#). By analyzing and evaluating high-quality news you will gain insight into the stock markets.

Technologies: Angular, Material, MySql, Jira, D3, Highcharts, Github, Firebase

[Smava](#) — Berlin, Germany

Frontend Developer — Employee Full-time

Feb 2016 - Feb 2017

Smava provides the best solution in Germany to find the right credit online with more than 50 bank collaborations. My position as a Frontend Developer was fundamental for the creation of the new [homepage](#). I worked on all the animation in jQuery and for the mail campaign. I also have a letter of [recommendation](#) from my manager Martin Cichowski after I left the company.

Technologies: HTML, CSS, Javascript, Foundation

[Tang Lang](#) — Viareggio, Italien

Frontend Developer — Freelancer

Apr 2014 - Dec 2015

Tang Lang Viaggi provides the best travel on a bus to all European events, like [Oktoberfest](#), [Cosmoprof](#), [IAA](#), [Geneva](#), [Christmas](#), [Lloret De Mar](#), and others in all of Europe. My job as a Full Stack Developer was to build 6 websites for different events in Europe with the same designs and provide a different theme for each event with a complex form for purchasing the event.

Technologies: JQuery, Javascript, MySql

[Maggiolino](#) — Viareggio, Italien

Full Stack Developer — Freelancer

Aug 2013 - Jan 2015

Maggiolino is an eCommerce [website](#) where anyone can find and buy specific books online. My position as Full Stack Developer required me to build the new website from scratch using jQuery and MySql following the Google image visualization.

Technologies: JQuery, Javascript, MySql

[Airesis](#) — Viareggio, Italien

Developer Designer — Freelancer

Apr 2011 - Apr 2012

Airesis is an open-source democracy [platform](#) where anyone can open a discussion and involve users to vote and discuss it. My position inside the company was UI/UX Designer and I worked with them for 6 months.

Technologies: JQuery, Javascript, MySql
